

Camosun's Math 12 Level and University Transfer Precalculus Courses

Revised May 20, 2018
by George Ballinger

Both [MATH 107](#) (Applied Precalculus) and [MATH 115](#) (Precalculus) are university transferable courses and either may be used as an alternate for high school Pre-calculus 12 or Principles of Mathematics 12.

Course	Prerequisite	Comments
MATH 107	C+ in MATH 073 or 137 or C+ in Pre-calculus 11 or Principles of Math 11 or C- in Pre-calculus 12 or Principles of Math 12 or assessment	<ul style="list-style-type: none"> • This 5 hr/wk university transferable algebra and precalculus course is a lighter (easier) version of MATH 115. It provides good preparation for MATH 108 and STAT 216 as well as business and arts programs. Students targeting technology programs at the Interurban campus may take this course or MATH 115. • If you are heading for MATH 100, then it is best to choose MATH 115 instead of MATH 107 since MATH 115 covers more algebra and trigonometry than MATH 107. However, MATH 107 with a grade of A or higher is an acceptable prerequisite for MATH 100. • We recommend that you have completed your prerequisite for MATH 107 within the past 2 years. If your algebra and trigonometry background is dated, then we strongly encourage you to first refresh with MATH 137.
MATH 115	B in MATH 073 or 137 or B in Pre-calculus 11 or Principles of Math 11 or C in Pre-calculus 12 or Principles of Math 12 or assessment	<ul style="list-style-type: none"> • This 6 hr/wk university transferable precalculus course provides an excellent foundation for MATH 100. To be successful in this course you need a strong and recent algebra background. • We recommend that you have completed your prerequisite for MATH 115 within the past 2 years. If your algebra and trigonometry background is dated, then we strongly encourage you to first refresh with MATH 137.
